

ETHICAL

AUSTRALIAN CORPORATE WEAR

BEHIND THE SEAMS

Take a look inside our factory and meet the people who make your corporate wear.

SEDEX ACCREDITATION

The Global Membership Organization dedicated to ethical business practices.

BUILDING A BETTER FUTURE

A more sustainable and ethical future for the garment industry.

BEHIND THE SEAMS

ETHICAL MANUFACTURING

UMS Vietnam is the manufacturing arm of UMS Australia, the parent company of Corporate Reflection. We own and operate our own garment factory in Vietnam and proudly provide full transparency into our manufacturing practices. We have genuine relationships with our employees and value their many years of experience and dedication to the company. We are fortunate to have such capable and motivated employees and we place the utmost importance on their health and safety in the workplace.

UMSV satisfies all guidelines set out by the International Labor Organisation including no child labour, no forced overtime, fair wages, and a safe workplace. Our staff also participate as members of an independent trade union body which vests them with collective bargaining powers over their working conditions and pay rates. We are very happy to discuss our factory with you further so please get in contact with us.

SEDEX ACCREDITATION

A GLOBAL MEMBERSHIP ORGANISATION.

The multi-tiered complexity of supply chains makes it difficult for companies to be aware or understand where products are being made. Sedex is a global organisation that supports responsible sourcing, making sure products and services are ethically and sustainably sourced throughout each level of the supply chain and protect the human rights of workers. They have over 55,000 members in over 180 countries.

UMS Vietnam is accredited under SEDEX which means we are controlled and regulated to ensure compliance with local and international laws related to operating ethically. They do not issue certificates, instead to maintain membership we must undergo yearly audits to ensure our compliance.

BUILDING A BETTER FUTURE

FOR THE GARMENT INDUSTRY

We want people to connect with the process of production and understand the impact that purchasing choices can make on the human rights of garment workers across the world. With the support of your organisation, we are working towards building a more sustainable and ethical future.
